

## BIOGRAPHY

### Jason McCague

*President and Founder*

At 31, Jason McCague is among the youngest executives in the Canadian facilities services industry, and a good example for young entrepreneurs to follow. Born and raised in Toronto, Jason first dabbled in the world of business through the establishment and management of *Doctor Windows*, a company he started at 16 years of age to clean residential windows. After several years setting up and

growing the business while still in high school, he successfully bestowed the burgeoning enterprise to his younger brother. Jason used his experience to open a second company in 1999 called *Signature Auto Leasing* to help connect car-hungry young adults with affordable leases.

In 2002, Jason harnessed his passion for and experience in the services industry to launch a janitorial company - a path not often trodden by his 24 year-old contemporaries. Back then, one of Jason's earliest objectives was to reach one million dollars in sales, a goal he attained in 2006 thanks to outstanding annual growth fluctuating between 20 to 25 per cent, a pace which continues year over year. Today, Jason's company has become one of the most formidable underdogs in an industry dominated by international heavyweights like Unicco, The Hurley Group and Hallmark Housekeeping. Facilities Services Corporation employs nearly 100 people on a full and part time basis nationwide. On a nightly basis, Facility Services manages over one million square feet of space and services more than 100 locations across Canada including companies like Praxair Canada Inc. (industrial), PAR Med property management (health care), Holt Renfrew (retail) and a variety of small to medium-sized businesses including numerous eye doctors, dentists and other medical facilities.

Now in his third and most promising venture, Jason's greatest source of pride is twofold: managing the growth of a company without a dependence on external sources of financing and creating a corporate culture that is caring, fair and hard working.
